WHEELCHAIRS

From Bariatric to Pediatric,
We've Got The Wheelchairs
You're Looking For!

5 Reasons to Buy Your Wheelchairs from Medline.

1. Great Prices

As a manufacturer who sells direct, Medline provides aggressive pricing on a full line of wheelchairs, parts and accessories.

2. Flexible Financing Programs

Medline offers leasing, extended terms and consignment programs to help customers better manage their cash flow.

3. Stronger Chairs That Last Longer

Medline engineers and tests our wheelchairs to provide many of the highest weight capacities available. Components throughout the chairs are designed to last for many years of rigorous use.

4. Faster Delivery

Our nationwide network of 23 distribution centers ensures rapid and frequent delivery so our customers can grow their sales and decrease their inventory. We also have a factory-direct program where you can save big money on large orders.

5. Personal Service

Medline has more than 700 sales representatives across the country to provide prompt, responsive and knowledgeable service.

Excel Wheelchairs: Better by Design

Before the first designs were drawn for the Excel wheelchair, our product development team agreed upon one idea—build a chair that fits comfortably into our customers’ budgets, but doesn’t sacrifice quality.

The entire Excel wheelchair line is designed to ensure that our wheelchairs provide unsurpassed quality, dependability and longevity. We recognize that a quality issue costs you time, money and your reputation. That is why we looked at every detail when designing our Excel wheelchair line.

Tig Welding

This weld may not look pretty, but it’s crucial to the durability of our wheelchairs. Most chairs are manufactured using a clean looking bronze weld. Tig welding creates a stronger bond and therefore a stronger chair.

Stainless Steel Ratchet Bar

Most wheelchairs use carbon steel, but that makes them more prone to corroding and pitting. Our stainless steel ratchet bars resist corrosion and stand up better to daily use.

EXCEL WHEELCHAIRS

Sealed Bearings

The fork housing and the rear and front wheels are constructed with low maintenance, sealed bearings to keep dirt out and increase the durability of the chair.

Anti-Strip Seat Screws

Medline uses threaded seat screw inserts to minimize the stripping that often comes with repeated upholstery changes.

Durable, Chip Resistant Chrome Plating

All Excel chairs with chrome plating undergo a triple plating process that resists flaking or chipping.

Reinforced and Oversized Chart Pocket

All of the Excel chart pockets are oversized and reinforced to make them easier to use and increase their durability.

Saddle Gel Cushion with New, Improved Quadra 3D™ Gel Pack

A supple polyurethane bladder conforms to the user's body, providing even greater pressure relief.

MSC1S1715

MSC1S1715L

Air Cell Cushions Offer Superb Pressure Relief

These therapeutic cushions provide ultimate care to fragile tissue. Individual cells adjust to each patient's body contours, flexing in multiple directions and decreasing body weight per unit area of the cushion. The decreased pressure allows an increased supply of blood necessary for healthy tissue maintenance and repair. Made of flame-retardant, latex-free neoprene rubber, cushion comes with a washable all-way stretch cover and hand pump for inflation. Choose from two heights for individualized needs.

HCPCS Code: K0108

Item #	Description	Pkg
High Contour 4" – For Maximum Support

Medline Visco Form

The Visco Form uses three different foam layers including high resiliency foam and 4lb visco elastic memory foam. The base layer's dense foam provides structure and support preventing the user from bottoming out. Visco layer is sandwiched between the HR foam. When the user sits on this cushion the visco elastic foam molds to their exact anatomical contour. This provides both maximum seating surface area for reducing high pressure zones and substantial contour to properly position the user.
