

PRODUCT INFORMATION

MediClip™ Surgical Clippers

- Safe, convenient hair removal
- Exclusive ergonomic design
- Enables compliance with current infection control guidelines

Support from National Patient Care Initiatives

Both the Surgical Care Improvement Project (SCIP) and the 100,000 Lives Campaign advocate the avoidance of razors before surgery. Proper hair removal is one of SCIP's process measures for preventing surgical site infections. It is also identified as a key component of "ideal perioperative care" by the 100,000 Lives Campaign. These two important initiatives aim to improve the quality of patient care nationwide.

Why use clippers instead of a razor?

Preoperative shaving with a razor can cause small cuts in the skin, opening the door to bacterial invasion and increasing the likelihood of a postoperative infection. Surgical clippers are a safe, effective alternative, and their use is recommended by AORN and the Centers for Disease Control and Prevention (CDC). The CDC's 1999 *Guideline for Prevention of Surgical Site Infection* states, "If hair is removed, remove immediately before the operation, preferably with electric clippers."

MediClip™ surgical clippers...designed for safety, comfort, and convenience.

MediClip surgical clippers have several important advantages. First, their exclusive ergonomic design means greater comfort for the user. Unlike other leading clippers, MediClip can be used with the wrist in a neutral position. Second, the high-quality nickel metal hydride (NiMH) battery provides longer run times (90 minutes of continuous use). It charges quickly and will not overcharge or suffer "memory loss" (charges that don't last as long) over time.

- Wide disposable blade allows quick hair removal and promotes infection control.
- Cordless operation provides greater OR safety.
- Waterproof clipper body can be rinsed, submersed, or wiped down.
- Charging base is included with clippers.

Ordering information:

Item #	Description	Pkg
DYND70840	MediClip surgical clipper with charging base	ea
DYND70845	Disposable blades	50/cs
