Free instructional video tape with order*

- Our push-button crutches are lighter than wooden models thanks to their aluminum construction.
- Double-extruded, center tube provides load-bearing strength where it is needed the most.
- Special footpiece utilizes durable rivets to secure the aluminum tubing from the inside, providing more stability than plastic connectors.
- Patented, I-beam, center post limits footpiece rotation to a ¼ turn, always keeping the push-button in view and facilitating easy adjustment.
- Long, virtually unbreakable stair deflector helps protect against the crutch slipping on stairs. It helps increase stress tolerance at all angles without cracking.
- Non-skid, rubber tips provide good traction. Built-in, metal ring helps prevent excessive wear and ensures maximum durability.
- Packaged completely accessorized, no assembly required.

High-Strength, Aluminum, Forearm Crutches are Built to Withstand the Toughest Use

- Vinyl-coated, tapered, contoured arm, cuffs mold to user for extra comfort.
- Pivoting cuff bracket is secured to a composite post for added durability.
- Comfortable, contoured, vinyl handgrips provide long wear.
- Leg and forearm sections adjust independently for a custom fit.
- All telescoping parts are manufactured with internal bushings and external lock nuts to provide silent usage.
- Recommended for long-term disability.
- All wear items (arm pads, hand grips and tips) are warranted for 6 months.

- 11-gauge, low-alloy, cold-rolled, welded, steel frame is processed on a computer-controlled metal forming line for increased strength, less weight, and consistently high-quality.
- Frame is painted with three coats of enamel and clear-coated to provide a strong finish that is chip and scratch resistant.
- Head and foot sections interlock with strong, dependable jaw and rivet connections. Sections overlap 6½" at this critical stress point, for added strength.
- Extra steel plate welded to frame
- Frame has lifetime warranty. One-year warranty for electrical parts.
- Only Serenity has U.L. medical equipment listing for entire bed.

- High-quality, 1/10 hp, U.L. listed motors with modular plugs, hospital-grade, three-prong plug, and fully-enclosed metal, junction box on U.L. 544 listed electric beds, help ensure patient and caregiver safety.
- Plug-in style junction box for easy replacement of motors and pendant
- Electric beds have covers over motor actuator to protect from dust and moisture.
- Extremely-reliable, self-leveling, bed-end, lift mechanism, with high-efficiency, variable force clutch (VFC), lifts more weight easily. VFC clutch adjusts more easily when leveling without loads.
- Hole-at-center, foot and head to accommodate I.V. pole.
- Walnut, woodgrain laminate, bed-end panels are attractive and easy to service.
- Bed ends are interchangeable with those of other major brands.
- Smooth-rolling, 3" casters make bed easy to move. Two casters have top-activated brakes to lock in place.
- Hinges placed inside frame to significantly reduce chance of pinching and provide increased safety.
- 500 lb. weight capacity.

Introducing...

The **NEW** Medline Retail Merchandising Program Designed to Maximize Your Profitability

Medline recognizes that many HME providers want to enhance their showroom floors and cash sales with retail products. Medline's now offers Medline Merchandising Solutions to help HME providers increase revenues on retail items.

Based on research with HME providers across the country, Medline has developed planograms that suggest the best items to feature in the bath safety, walking aids and bariatric categories. Medline's Merchandising Solutions also include attractive valences, aisle violators, banners, and posters to enhance the appeal and prominence of your retail section.

For more information contact your Medline sales representative or call **1-800-MEDLINE**.
