

# Patient Lifts

## WHAT'S SO GOOD ABOUT OUR LIFTS? EVERYTHING.

Strong, reliable, easy to operate and backed by a 3-year warranty.

Medline is pleased to introduce a whole new line of patient lifting equipment, including stand assists, elevating lifts, and comfortable patient slings. We know how important it is for you to keep your employees safe, and at the same time provide safe patient care. Medline has the lifting products and our Safe 'n Easy Patient Lifting Program to help you address these concerns.

### QUICK FACTS

- Stand assists available in 400# and 600# versions.
- Elevating lifts available in both hydraulic and electric versions (400#, 600#).
- Base legs on electric lifts spread with a reliable, easy-to-operate foot pedal.
- Low-profile (4.7") base legs easily move under beds and other furniture.
- Powerful 24V batteries provide 80-100 patient lifts on a single charge.
- Controls are easy-to-operate, and common between lifts.
- 6-point sling cradles provide flexibility for maximum comfort and safety.
- Slings are made of soft, easy-to-clean, long-lasting polyester material.
- Emergency switches on elevating lifts to lower patients.

## Safe 'n Easy Lifting Program

Our program is evidence-based, reflecting the best thinking and practices in patient lifting. This includes, for example, work accomplished by the 2001 Technical Advisory Group (a collaboration of the VHA Public Health and Environmental Hazards, the Patient Safety Center Inquiry, and the Healthcare Analysis and Information Group, as well as the 2005 National Task Force (representatives from the American Association of Rehabilitation Nurses, the American Physical Therapy Association, and the Veterans Administration).

**Implementation Plan**  
Manage implementation of your formal lifting program through an easy-to-use checklist. You can designate who is responsible and stay on track.

**Customizable Lift Policy**  
Ensure you have a thorough policy on record, covering all aspects of your lift program. Responsibilities, equipment requirements, and maintenance procedures are all covered in this customizable policy.

**Assessment Tools**  
Assess your incoming patients to ensure you have the proper lifting protocols in place. Consider all physical and cognitive factors to ensure you make the right decision – maximizing patient care and employee safety.

**Inservicing Video**  
Train your employees in the proper operation and maintenance of patient lifting equipment. This short DVD reviews all the basic moves to ensure your employees are competent in moving and repositioning patients.

**Expert Phone Support**  
Our lifting specialists can help you with your questions and guide you step-by-step in implementing a complete patient lifting program.
