Medline Bariatric Products

5 Reasons to Buy Your Bariatric Products from Medline.

1. Great Prices

As a manufacturer who sells direct, Medline provides aggressive pricing on a full line of products.

2. Flexible Financing Programs

Medline offers leasing, extended terms and consignment programs to help customers better manage their cash flow.

3. Higher Weight Capacities

Medline engineers and tests our bariatric products to provide many of the highest weight capacities available.

4. Faster Delivery

Our nationwide network of 23 distribution centers ensures rapid and frequent delivery so our customers can grow their sales and decrease their inventory.

5. Personal Service

Medline has more than 700 sales representatives across the country to provide prompt, responsive and knowledgeable service.

We guarantee everything we sell. Should you have any problem with a Medline product, please call us or speak to your Medline Sales Representative. We will take care of the problem right away, either by cheerfully and promptly exchanging the product or by crediting your account.

We're confident our Durable Medical Equipment will provide you with years of convenient, dependable service.

If you have questions about our products, call us at **1-800-MEDLINE**.

Comfort Riser™ High Low Bed

The Comfort Riser bed will accommodate all your residents more comfortably. When a resident comes from a home environment they are accustomed to sleeping in a larger bed and adjusting to a standard nursing home bed is difficult for some. The Comfort Riser is ideal for larger residents requiring additional space and a bariatric bed is more than they need. The Comfort Riser High Low Bed features the high-low function from 7"-26" and 500lb weight capacity. The whisper quiet DC grade motors will run smooth and efficiently. The 360 degree caster system makes it very easy to reposition the bed for cleaning. The Comfort Riser will differentiate you from other facilities by providing a larger more comfortable bed for all your residents. Warranty: 2 years bumper to bumper and lifetime on frame.

26" Height for Caregiver Comfort

Travels Straight Up and Down. No More Scratched or Gouged Walls

- Mobile at any height
- Height Range 7"- 26"
- 4 DC Motors
- 500lb Weight Capacity
- 39" Wide Sleep Surface
- Baseboard Bumper

Comfort Riser High Low 39"x 80" Bed

Item #	Description

Bariatric Low Air Loss Mattress Supports Patients up to 700 lbs!

This bariatric low air loss system is one of the most cost effective alternatives for skin protection and pressure sore prevention for larger patients. It features "true" low air loss technology and quietly circulates air through 16 individual cells. Air escapes from 33 air openings and is distributed equally across the top of the mattress surface, circulating under a vapor permeable cover to wick moisture away from the patient's skin. This mattress can be used on patients with any stage ischemic (pressure) ulcer, myocutaneous skin flaps, skin grafts and/or patients with temperature, moisture control, or pain management issues.

- **700 lb weight capacity.**
- Available in 39", 42", 48", and 54" widths.
- Reliable, whisper quiet operation with low energy consumption.
- Portable and lightweight.
- User friendly control panel run by a microprocessor.
- Pulsation (alternating pressure) offered in three cycle settings that continually readjust to ensure patient comfort.
- Firm mattress mode with timer helps facilitate nursing care.
- Upright patient mode gives added support when higher elevation is required.
- Quickset option allows you to input the patient's actual weight so you can preset pressure.

Durable Dan says,
"Medline mattresses feature innovative technologies to help reduce the formation of pressure ulcers."

Bariatric Foam Mattresses Provide Needed Pressure Reduction

500 and 1000 lb weight capacities.

These three-layer foam mattresses help prevent the formation of pressure ulcers. The top layer of high resiliency foam allows surface to mold to the patient's body, the middle layer adds firmer support, the bottom layer provides proper orthopedic support and prevents bottoming out. Nylex II cover is laminated for excellent stain and fluid resistance the bottom is heavy gauge vinyl for slip resistance. Ticking and foam are completely antimicrobial to prevent nosocomial infections and eliminate odors.

ExpandaCare™ Transport Bed has a 1,000 lb. weight capacity and adjusts up to 54" wide.

The new ExpandaCare Bariatric Bed adjust from its full mattress width of 54" to 39.5" in less than one minute. This allows it to pass through doorways and elevator entries as narrow as 40", resulting in fewer transfers, less chance of injury for both you and your patient. This is the only true transport bed with 1000 lbs. capacity and adjustable width up to 54".

- **Delivered with main frame assembled.**
- Can accommodate lateral rotation mattresses up to 54".
- Single button cardiac chair position and single button return to supine, for quicker patient access.
- Single button Trendelenberg operation without having the bed either full up or full down. Plus, you will never have to crawl under the bed to flip a Trendelenberg switch. It is emergency situation-ready.
- Steer-Lock and Total casters positioned for safety, stability and easy maneuverability.
- Optional scale system in Model #3954-S provides accurate patient weights at the touch of a button, no matter what position of the patient or the bed. Optional trapeze.

Built in scales—range up to 1000 lbs.

Stage IV® 3000 Bariatric Multi-Zoned Pressure Relief System

The Stage IV 3000 has three pressure zones for maximum patient comfort and therapy. Ideal for patients with advanced stages of pressure wounds, the STAGE IV 3000 offers more aggressive therapies by combining Pressure Relief and Patented Controlled Air Loss (C.A.L.™).

- Alternating Pressure and Controlled Air Loss in a single system
- 3 Pressure Zones; head, trunk, and foot sections can be individually customized
- C.A.L.™ is the only low air loss patented to reach the patient's skin
- Alternating pressure relief to zero pressure
- Firm/transfer mode
- Air floatation mode
- Rapid deflation mode
- Digital displays of actual pressures
- Zippered, sealed system with 18 interchangeable air cells, 6.5" cell height
- Integrated 2" foam mattress below cells
- Automatic Settings based on individual patient weight and height
- Supports patients weighing up to 1000 lbs

Controlled Air Loss

Many competitive Low Air Loss products use perforated mattress air cells to achieve “low air loss”. Medline’s Stage IV and TheraTurn systems can provide Controlled Low Air Loss (C.A.L.™) without perforated air cells. Our Patented process delivers improved air circulation to the patient to help prevent heat and moisture build-up on their skin. If necessary, the caregiver has the ability to turn off the C.A.L.™ therapy with one touch of the control pad. Best of all, our C.A.L.™ therapy can be altered independently of the Alternating Pressure Therapy. Since the air cells of our Stage IV and TheraTurn products are not perforated, they remain fully inflated during patient transport or in case of a power outage.

Advance Design

Advanced technology provides improved therapy and ease of operation. Our Patented Controlled Air Loss (C.A.L.™) delivers improved air circulation to the patient reducing heat and moisture build-up on their skin to help prevent tissue breakdown. The use of superior materials in our mattress coverlets also helps reduce the risk of skin shear. Our whisper quiet air pumps provide the proper therapy while maintaining a pleasant healing environment.

State of the air electronics assure the selected pressure therapy is delivered to the patient. The use of alternating inflated and deflated cells provides our pressure therapy. As cells are deflated, pressure reduces to zero in those areas while support of the patient is maintained by inflating alternating cells.

In the event of power failure, air is “locked” in our inflated cells for up to 24 hours providing greater patient safety. Most competitive products use perforated air cells, which will deflate when power is lost. Superior therapy and worry-free operation is the hallmark of every Medline product.

MDS495DV

MDS305XL

Medline Synchro Compression System

Simple to Use

The Synchro pump works with "Intelligent" connectors on our garments. These connectors synchronize the pump to provide the proper sequential compression therapy with the garment being used. This eliminates the knobs and pressure adjustments found on competitive pumps and garments.

The Synchro pump also recognizes when only one garment is attached, automatically adjusting the therapy. This eliminates the need to use a full pair of garments or a "plug" for unilateral applications. Our advanced technology makes the Synchro system extremely flexible and simple to use.

Greater Comfort Helps Increase Patient Compliance

The Synchro compression garments are finished inside and out with a soft velour fabric which provides increased patient comfort. Our two-piece thigh length garment helps eliminate material from around the knee, thus allowing greater air flow to the area and more comfortable knee flexion.

Our foot compression system works sequentially with a soft massaging action. Many patients find our therapy more comfortable than competitive models using high pressure foot compressions.

Item #	Description	Pkg
MDS305XL	DVT Sequential Compression Garment XL Thigh	12/pr
MDS495DV	Synchro DVT Sequential Pump	ea

Synchro Pump Features

Silent pump

Reduce noise level in room, especially at night

Small, lightweight

Easy to handle, store and locate in patient's room

Full alarm system

Alerts staff to possible faults which may affect system use, such as power failure, kinked tubing, etc.

Back-lit display

Allows staff to see control panel without turning on room lights

Automatic pressure

range selection
Unique color-coded connector plugs allow power unit to detect specific garment style and set pressures to proper ranges

Comfort selector

Allows staff to make minor pressure adjustments within proper ranges to provide additional patient comfort when using leg garments

Data log

Internal memory keeps track of usage hours for biomedical review and service. Also may be used to program or retrieve special information

Universal system

Allows use of the three most popular types of pneumatic compression garments (thigh, calf, foot) using only one pump

Synchro Garment Features

Synchro deluxe velour garments

Single patient use garments are made with PVC, but covered inside and out with soft velour fabric, reducing heat and perspiration against the skin, increasing patient comfort

Universal sizing

The velour covering allows nearly universal sizing, reducing inventory from six sizes to two

Two-piece thigh

This unique style allows complete freedom of movement without a plastic panel behind knee. This allows more air circulation and increased patient comfort. The two piece design is also easier for nursing staff to apply

Medline's Single Patient Use Cuffs

are made from a soft, comfortable woven polyester fabric in clean hospital white. Each cuff has rounded corners and finished edges for optimal patient comfort. Genuine Velcro® closures ensure a lasting and snug fit for every patient. Cuffs come in a wide range of infant to adult sizes, each color-coded for convenience. A complete line of connectors and adapters connect cuffs to virtually every non-invasive blood pressure monitor. All sizes meet the American Heart Association recommendations for accuracy.

**Longs available Add "L" after connector type code

* Insert appropriate letter code to specify the type of unit you need the connector for:

- DM Recommended for GE (Critikon/Dinamap), CAS, Criticare, MDE, Welch Allyn, and Invivo Research (Omega) units.
- HP Recommended for Phillips (Agilent/HP), Criticare, Datascope, Newer Spacelabs (Instrumentarium) and Siemens units.
- SL Recommended for Older Spacelabs (Instrumentarium), Datascope, Drager, Fukuda Denshi, BCI, Colin, Welch Allyn or Nihon Kohden units.
- MQ Recommended for GE (Marquette) and Welch Allyn units.
- MQMF Recommended for Datex Ohmeda units.
- MB** Recommended for manual manometers.
(manual bulb)

- Note:
- 1) Vinyl fabric available on most single-patient cuffs. Soft, comfortable cuffs will be delivered with orders unless a "V" follows the connector type code.
 - 2) Yellow vinyl cuffs are available in select sizes for isolation areas

latexfree All Medline Single Patient Use Cuffs are latex-free!
