

# Ultrisorbs™ Premium Disposable Underpad

*The most advanced underpad for optimal skin dryness*

*Keeps the bedding and patient dry*

**Now  
Available**

**Ultrisorbs Breathable**  
*For use on low air loss beds*

*“We are very impressed with Ultrisorb's performance. It is the only underpad we have seen that wicks away fluid and keeps the patient's skin dry. Ultrisorbs has allowed us to start open-airing at night as part of our updated pressure ulcer prevention program. Our patients are more comfortable, and the staff can do a change easier and faster than with briefs.”*

*- Pauline Obura-Wilkes, RN  
Director of staff development/Wound care coordinator,  
Hamden Health Care Center*

*“Ultrisorbs has saved us over 20% in product cost alone because of its extraordinary absorbency and dryness. We went from using an average of 3 – 4 underpads to just one Ultrisorbs. We were also impressed with the strength and the consistent quality.”*

*- DON, Skilled Nursing Facility,  
Sacramento, California*

*“We standardized all our underpads to Ultrisorbs because of its high quality and absorbency. We have reduced our staff time as well as product usage because we are not having to change as often. The net result is savings and better care.”*

*- Materials Manager, Hospital  
Houston, Texas*

*As noted in WOCN 2003 Guidelines,  
**Managing skin moisture is a critical  
factor in maintaining skin integrity  
and reducing the incidence of  
pressure ulcers.***

**Ultrisorbs wicks moisture away from  
the patient's skin and is super absorbent  
to provide optimal skin care.**

## Ultrisorbs™ Premium Disposable Underpad

- Advanced Supercore™ thermo-bonded core delivers superior skin dryness and resident comfort.
- Wicks moisture away from the skin and locks fluid away to provide better skin care and resident dignity.
- Super absorbent – 1 Ultrisorbs absorbs what used to require 3 or more underpads.
- Super strong to reduce tearing and resulting linen changes.
- Superior odor control.

### Unique Construction

- Folded over edge for better containment.
- Soft non-woven top sheet across the pad protects skin from contact with the poly backing.
- Ultra absorbent polymer is spread throughout the entire core for maximum absorbency.
- Top sheet is fused to the core so it does not stick to the skin or bunch up while in use.

Advanced SuperCore™ (Thermo Bonded Core)

**Now available in two styles**

### Ultrisorbs™

- Waterproof polyethylene backing protects underlying surfaces.

**Item No:** MSC282100  
**Size:** 23" x 36" overall,  
21" x 32" absorbent core  
**Packaging:** 70 per case (bags of 10)

### Ultrisorbs™ Breathable

- For use on low air loss beds.
- Spun-bond breathable backing allows air to flow up through the pad while still protecting the bed.

**Item No:** MSC282500  
**Size:** 23" x 36" overall,  
21" x 32" absorbent core  
**Packaging:** 60 per case (bags of 10)
